Description

Know what's happening within 10 miles — right now.

Voxlo is your hyperlocal community pulse. Get real-time traffic conditions verified by TomTom, local events from Ticketmaster, weather updates, and posts from neighbors — all filtered to a 10-mile radius around you.

Share a pulse about road closures, restaurant wait times, local events, or just the vibe in your neighborhood. See what your community is talking about, without the noise of global feeds.

WHAT YOU GET:

• 10-Mile Radius — Only what matters to your immediate community. No global noise.

• Real-Time Traffic — Live road closures, congestion data, and commuter mood verified by TomTom.

• Local Events — Sports, concerts, community gatherings from Ticketmaster and local sources. Add to calendar, get directions, or share with neighbors.

• Weather & Mood — Current conditions and community vibe at a glance.

• Anonymous Posting — Auto-generated usernames. No real name required. Share freely.

• AI-Powered Moderation — Every post reviewed across 10 content categories to keep the community safe.

• Zero Tracking — Your location stays on your device. We never sell data. Coordinates rounded to ~1km for privacy.

WHY VOXLO:

Most social apps show you what's trending globally. Voxlo shows you what's happening on your street. Road closure on your commute? A new restaurant opening nearby? Neighbors buzzing about a local event? That's Voxlo.

Built for neighbors, not followers.

Promotional Text (170 char max, can be updated without new review)

Your neighborhood in real-time. Traffic, events, weather, and community vibes — all within

10 miles. Zero tracking. Built for neighbors, not followers.

What's New (for version 1.2.0)

- Real-time traffic with TomTom verification

- Local events with calendar integration

- Community posting with vibe selection

- AI-powered content moderation

- Anonymous accounts with auto-generated usernames

- 10-mile hyperlocal radius
